THE PHYSICS TEACHER

Volume 12

1974

SUBJECT INDEX TO VOLUME 12

The subject index lists titles of articles, notes, and letters together with the names of their authors. Classification is based upon analyses of contents rather than upon the titles shown.

AAPT & AIP Activities
Apparatus, Demonstration
Apparatus, Laboratory
Astronomy and Astrophysics
Atomic and Molecular Physics
Awards
Book and Film Reviews
Computers

AAPT & AIP ACTIVITIES

An Introduction — Sherwood K. Haynes, H. Richard Crane—70
Report of the Executive Officer, A.A. Strassenburg—14, 76, 144

APPARATUS, DEMONSTRATION

A Great Learning Experience (Letter), William Dempsey—260
A high speed electronic control for short-interval timers, George Barnes—438
A Pinch of Coffee-mate (Letter), Ben M. Doughty—132
A red hot demonstration, Kennedy Carpenter— 570
A resonance demonstration, Monte M. Giles—178
A Simpler Planetarium Dome (Letter), Carl Rutledge—68
A Teacher-Student Built Sky Projector, David N. Riban—471
Absorption of radiation — a lecture sized demonstration, Dean Zollman— 563
An Electronic Spirograph, J. Gerard Anderson—89
Another Use (Letter), Glen Spielbaur—388
Assemblies of single concept demonstrations, Haym Kruglak— 568
Bimetallic on the overhead, Mark W. Seng—360
Bow for vibrating plates, Robert H. Johns—500
Brownian movement, Sister Martha Ryder— 574
Cartesian diver, Richard F. Kotheimer— 576
Cathodoluminescence Apparatus, Glen Spielbauer—175
Center of mass, R. Kennedy Carpenter— 572
CO_2 cartridge firing mechanism, Peter Boileau—50
Coefficient of friction apparatus, Harold J. Born—367
Color anodizing, Ronald A. Kobiske— 569
Convex lens as a diverging lens, Bro. James Mahoney C.F.X.— 574
Electrical Circuits and Water Analogies, Frederick A. Smith and Jerry D. Wilson—396
$F = q \vee x B$; A simple demonstration, Robert M. Donner— 574
Families of transistor characteristics on an oscilloscope, George Barnes—239
Farraday's Law and the Curtis Elapsed Time meter, Jay S. Huebner—114
"Fish Tank" laser diffraction, Richard K. Kotheimer—307
Free-fall, induction and oscilloscope, B.G. Eaton—115
Gas-Law apparatus made of copper wire pipe, George Barnes—306
"Glue" for plexiglass, Sister Martha Ryder— 570
Heat shrinkable tubing, Ronald A. Kobiske— 569
How and Why to Start an Apparatus Company, R.D. Stephenson— 548
How Valuable Are Professional Apparatus Evaluations?, Herbert H. Gottlieb— 518
Ice cube regelation, Wallace A. Hilton—307
Inertia demonstration, Paul G. Hewitt—30
Laser gimmick, William H. Porter—239
The Manufacturer's Story, Steven Janke and Paul Stokstad 532
Measuring the thrust of a model rocket, Mervin Brubaker—488
Mirror projection of an electroscope, Edwin Paul Heideman—368
More on the Cartesian Diver (Letter), Frank T. Dietz—51
Nuclear physics in a coffee cup, J. Higbie—29
The physics of Bing-Bang-Boing, Dean Zollman—358
Projectile gun for an air track glider, George Barnes—177
Projectile launchers for electric trains, Robert Q. Kimball— 571
Plaster of Paris mold making, Roy Coleman— 571
Protecting electronic tubes, Glen Spielbauer— 568
Regelation made easier, Robert T.F. Neff— 575
Removing scratches from clear plastics, Herbert H. Gottlieb— 570
Revising the Standard (Letter), Robert Tinker—133
Safety in the Physics Lab, Bro. T.G. Bullen— 579
Simple AC Demonstrator, Robert F. Neff— 574
Simple resistance thermometer, L.C. Corrado— 573
Small part storage, Sister Martha Ryder— 568
Soap film interference projection, John A. Davis 177
Sound-proofed box for air track blower, John A. Davis— 573
Storage and display box for a diffusion cloud chamber, Haym Kruglak—568
Storage of support cable from high ceiling, John A. Davis— 569
Three dimensional magnetic field, Walter C. Connolly 575
Toward Improved Apparatus and Better Experiments, F.E. Christensen— 564
Translucent screens for optical projections, John A. Davis— 575
The vertical view, John A. Davis—575
Wave motion demonstrator, Marc D.

Levenson—47

APPARATUS LABORATORY

A high speed electronic control for short-interval timers, George Barnes—438
A precise time base for the physics lab, John G. Johnson— 576
A quickly made galvanometer shunt, James Reynolds— 572
A rack for test tubes, R. Kennedy Carpenter— 569
A resistor board, Walter C. Connolly— 572
A simple timing device, Edwin Paul Heideman— 575
An electronics laboratory for physics students, John McKinnon—425
Better spreader for Polaroid colorpack II cameras, B.G. Eaton— 576
Cenco 79551 power supply—A safety hazard, Howard C. Hayden—365
Current balance and Coulomb's law apparatus, Richard K. Fry and Wijit Senghaphan—435
Einstein's train in the lab, Joseph Shaffer—103
Electrostatic charging of fur and silk, John A. Davis— 571
Emptying ripple tanks, Spencer Livingston— 569
Falling Body Apparatus M105, An Evaluation, Noah Rosenhouse—176
Fast square wave generator, Ronald A. Kobiske— 572
FET electrometer, Robert H. Johns—113
The firefly, and LED Blinky, David W. Eckert and James Schimpf—48
For Limited Budgets (Letter), Yeu Pyng Hwu—247
The 4-layer trigger diode, Jeffrey L. Hock, and Ronald A. Kobiske—179
Fused ammeters, S. Winston Cram— 570
Going Three Dimensional (Letter), Elizabeth A. Wood—196
Hang those meter sticks, Buford M. Guy— 568
How and Why to Start an Apparatus Company, R.D. Stephenson— 548
How Valuable Are Professional Apparatus Evaluations?, Herbert H. Gottlieb— 518
Inexpensive immersion heater, Frank G. Karioris— 573
Inexpensive tuning forks, Robert H. Johns— 575
Laboratory notes on slides, Thomas B. Greenslade, Jr.—431
Laser beam optical lever, A. Kshatriya—501
Laser Safety Goggles—An Unnecessary Expense, Herbert H. Gottlieb—51
Latex sphere clusters in Millikan's experiment, Monte Giles and Ernest Johnston— 571
Let students prove it to themselves, R. Kennedy Carpenter—482
Low Friction Laboratory Equipment — A Survey, Guenter Schwarz— 540
Magnetic base for optics, Wallace A. Hilton—49
The Manufacturer's Story, Steven Janke and Paul Stokstad— 532
Markers for Young's experiment (PSSC Version), William H. Porter—178
Measuring Planck's constant using a light emitting diode, L.R. O'Connor and P.J. O'Connor—423
Mechanical resonance with an incandescent filament, John Kwasnoski—302
The meter stick pendulum, L.C. Corrado—494
Miniature diffraction gratings, Herbert H. Gottlieb— 576
Modifications to an electric field plotting apparatus, T.R. Sandin—241
Oscilloscope shade, Bro. Lester Dwyer—117
Photocurrent detection with an oscilloscope, Monte M. Giles— 570
Physics really does work, Fiona M. Gurr and Mimi Lafleur—235
Plywood gate for equilibrium problems, James H. Stith—502
Poor man's mercury source, K.E. Davis— 576
Removing scratches from clear plastics, Herbert H. Gottlieb— 570
Revising the Standard (Letter), Robert Tinker—133
Ripple tank wave absorbers or shoals, Haym Kruglak— 571
Rubber Band Lab (Letter), Robert Kern Curtis—452
Rubber band lab, John Dowling, Jr. and George H. Mullen—231
Rutherford scattering box with 10^7 GeV accelerator, Jerry D. Wilson—437
Safety in the Physics Lab, Bro. T. G. Bullen— 579
Sargent-Welch scattering apparatus, an evaluation, Robert J. Jasinski and Jeffrey C. Weitz—305
Scope shade, J. Gerard Anderson— 572
SCR, diode, and Zener diode tester, George Barnes—499
Series and parallel electric circuits, Bro. James Mahoney C.F.X.— 572
Simple accelerometers, Robert Gardner— 572
Simple lab power distribution system, William H. Porter— 573
The speed of a pendulum bob, Richard F. Kotheimer— 570
Take Physics to Ninth Graders with Budget Savers, R. Kennedy Carpenter—77
Tool board outlines, Sister Martha Ryder— 569
Toward Improved Apparatus and Better Experiments, F.E. Christensen— 564
Tracing characteristic curves with a chart recorder, Raymond Rajotte—367
Using a laser to investigate free fall, Edward V. Lee—168
Using Polaroid negatives, B.G. Eaton— 576
Velocity of sound by resonances, Jim Allen and Buford Guy—117

ASTRONOMY AND ASTROPHYSICS

A Great Learning Experience (Letter), William Dempsey—260
A simple earth-moon trajectory calculation, Albert D. Grauer and N. Bruce Tanis—169
A Simpler Planetarium Dome (Letter), Carl Rutledge—68
A Teacher-Student Built Sky Projector, David N. Riban—471
Photoelectric Devices in Astronomy and Space Research, George Carruthers — Part I—135, Part II—221
Project Vesta: A Laboratory Exercise on the Measurement of Celestial Coordinates, David E. Laird—338
Projectile motion and circular orbits, Van. E. Neie—102
The Second Longest Year (Letter), Mark R. Chartrand III—308
The Sun Triangle: a decorative teaching device, Dinah Moche—357

ATOMIC AND MOLECULAR PHYSICS

Cathodoluminescence Apparatus, Glen Spielbauer—175
Latex sphere clusters in Millikan's experiment, Monte Giles and Ernest Johnston— 571
Measuring Planck's constant using a light emitting diode, L.R. O'Connor and P.J. O'Connor—423
The new design x-ray image intensifier tube, Leonard Stanton—497
Photocurrent detection with an oscilloscope, Monte M. Giles— 570
The Photoelectric Effect and the Eye (Letter), Jay S. Huebner—453

Studying solid surfaces by ion scattering spectrometry, Victor G. Mossotti—181

AWARDS

AAPT Distinguished Service Citations for 1973—292
1974 Millikan Award (Harald C. Jensen), E. Leonard Jossem—400
Oersted Medal for 1973 (Melba Phillips), Kenneth W. Ford—198

BOOK AND FILM REVIEWS

A Study Guide for General Physics (Non calculus), Simon George. Reviewed by S. Winston Cram—371
An Introduction to Astronomy, 8th Ed. L.W. Fredrick and R.H. Baker. Reviewed by David H. DeVorkin—373
Applied Physics, Paul E. Tippens. Reviewed by Jack D. Foster—444
The Armillary Sphere: model and booklet. Seymour Robins. Reviewed by Melba Phillips—443
Astronomy Through Practical Investigations, G. Lomaga, W. Smiley and R. Warasila. Reviewed by Matthew P. Thekaekara—506
The Backyard Astronomer, Alan E. Nourse. Reviewed by Mark R. Chartrand III—505
Basic Physics: A Linear Approach, Joseph W. Straley. Reviewed by George Freier—373
Benjamin Franklin, New World Physicist, Raymond John Seeger. Reviewed by R. Bruce Lindsay—504
College Introductory Physical Science, IPS Group of Education Development Center. Reviewed by Frank R. Pomilla—372
College Physical Science. Third Ed. Owendell H. Scabaugh and Alfred B. Butler. Reviewed by F.M. Carter—444
Collisions, Coalescence and Crystals, Ralph Morgan. Reviewed by S. Winston Cram—315
The Coming of Solar Energy, D.S. Halacy, Jr. Reviewed by Matthew P. Thekaekara—443
Concepts in Physics, Reuben Benumof. Reviewed by Paul F. Bartunek—56
Creativity and Intuition. A Physicist Looks at East and West, Hideki Yukawa. Reviewed by Allan W. Sachs—505
Discovering the Natural Laws — The Experimental Basis of Physics, Milton A. Rothman. Reviewed by Sigmund Abeles—54.
Education in and History of Modern Astronomy, R. Berendzen. Reviewed by Matthew P. Thekaekara—54
Elementary Particles, Haven Whiteside. Reviewed by Richard A. Marble—504
Environmental Pollution, Laurent Hodges. Reviewed by Robert Smolker—371
Exploring the Physical Sciences, Willard J. Poppy and Leland L. Wilson. Reviewed by Edmund Bray—187
The Field Concept in Contemporary Science, Mendel Sachs and Charles C. Thomas. Reviewed by Richard Schlegel—185
The First Book of Mars, David Knight. Reviewed by W.E. Greig—314
The Foundation of Modern Science, Jerry B. Marion. Reviewed by Robert Weber—186
Fundamental Electrostatics, S.W. Hockey. Reviewed by C.L. Andrews—54
General Physics, Oswald H. Blackwell, William C. Kelley and Raymond M. Bell. Reviewed by Noel C. Little—313
Graduate School in the Sciences: Entrance, Survival and Careers, J.G. Calvert, J.N. Pitts, Jr. and G.H. Dorion, Reviewed by Eric Rodgers—118
Heat, Vicki Cobb. Reviewed by Maria B. Penny—373
Introductory Astronomy, Nicolas A. Pananides. Reviewed by R. Charles Ivey—250
Introduction to Concepts and Theories in Physical Science, 2nd Ed. Gerald Holton and Stephen G. Brush. Reviewed by Alfred Romer—248
Invitation to Physics, Ken Greider. Reviewed by Peter Fong—372
Knowing the Atomic Nucleus, R. Hobart Ellis, Jr. Reviewed by Robert Gardner—185
Laboratory Physics, Harry F. Meiners, Walter Eppenstein and Kenneth H. Moore. Reviewed by Robert W. Detenbeck—251
Laboratory Studies in the Physical Sciences, George Moriber and Isidore Hudes. Reviewed by Sherwood Githens, Jr.—56
Man and the Computer, John G. Kemeny. Reviewed by Robert E. Chesley—53
The Man Who Saw Through Time, Loren Eiseley. Reviewed by Stephen Brush—184
The Master of Light, A Biography of Albert A. Michelson, Dorothy Michelson Livingston. Reviewed by R.S. Shankland—312
Mathematical Preparation for General Physics with Calculus. Reviewed by Albert C. Claus—316
Mathematical Thought from Ancient to Modern Times, Morris Kline. Reviewed by Lester G. Paldy—186
Nuclear Energy: Its Physics and Its Social Challenge, David Rittenhouse Inglis. Reviewed by Melba Phillips—52
The Origin of the Chemical Elements, R.J. Tayler. Reviewed by Richard M. Whitney—187
The Photoelectric Effect (film loop). Reviewed by Thomas B. Greenslade Jr.—
Physical Science II. Physical Science Group. Reviewed by Andrew Cordell—120
The Physical Universe. Reviewed by Robert Gardner—314
Physics, an Introduction for Students of Science and Engineering, M. Paul Hagelberg. Reviewed by Stanley Lictman—250
Physics and Computers, Robert Ehrlich. Reviewed by Reuben E. Alley, Jr.—121
Physics — Concepts and Models, E.J. Wenham, G.W. Dorling, J.A.N. Snell, and B. Taylor. Reviewed by Herbert Priestly—120
Physics in Perspective: The Nature of Physics and the Subfields of Physics, Physics Survey Committee of the National Research Council. Reviewed by Thomas D. Miner—316
Physics in the Twentieth Century, Victor F. Weisskopf. Reviewed by Nandor Balazs—119
Radioisotope Laboratory Techniques, 3rd Ed. R.A. Faires and B.H. Parks. Reviewed by Coca T. Rao—56
Radiation Damage in Solids, (film loop). Instructional Media Center. Reviewed by Cecil Shugard—122
Relativity and Cosmology, William J. Kaufman III. Reviewed by Thomas E. Morgan—315
A Review of a Review (Letter), Mendel Sachs—380
Scattering in One Dimension, Part I: Barriers (film loop). Reviewed by Stephen D. Schery—
Science and Controversy: A Biography of Norman Lockyer, A.J. Meadows. Reviewed by Esther Sparberg—52
Science and Human Destiny, Norman F. Dessel, Richard D. Nehrach Jr., and Glen I. Voran. Reviewed by

Ernest C. Pollard—316
The Scientific Approach, J.T. Davis. Reviewed by Reuben Benumof—249
The Search for a Theory of Matter, Mendel Sachs. Reviewed by V.V. Raman—53
The Solar System, Zdenek Kopal. Reviewed by William Buscombe—249
Solid State Electronic Devices, D. V. Morgan and M.J. Howe. Reviewed by Paul P. Craig—118
Source Book for Chemistry and Physics, Hittle, Stekel, Stekel and Anderson. Reviewed by Robert E. Chesley—506
Strong Materials, J.W. Martin. Reviewed by John C. Bilello—185
The Structure of Matter, Joan Solomon. Reviewed by J. Noel Corbridge—505
Track and Field Dynamics, Tom Ecker. Reviewed by Richard A. Marble—122

COMPUTERS

Computer based dialogs: a supplement to the physics curriculum, Vincent N. Lunetta—355
Games Physicists Play (Letter), John R. Prince—308
The rocket game, Gregory Baker and Cameron C. Pitcairn—427
Using a computer to individualize student work: the computer and individualization of student problems, Richard Mihm—38
Using a computer to individualize student work: a computer program to generate exams and homework assignments. Allen Rosen—39

COURSES

Electronics in High School (Letter). Ronald Tedesco—5
Individualized Project Physics. Donald Collins and Connie M. Madden—465
Physics and Sport: A new course for nonscience majors. Angelo Armenti, Jr.—349
Physics in the seventh grade. Don Grant—167
Physics Is Great! Timothy Kersey and A.J. Fiske—25
Search in Sciences — An approach for nonscience students. James Della Valle—30
Take Physics to Ninth Graders with Budget Savers. R. Kennedy Carpenter—77

EDITORIALS

A hidden agenda, Clifford E. Swartz—326
AAPT sections and university faculty — a challenge, Sherwood K. Haynes—71
But will it be science? Clifford E. Swartz—390
Images and views, Clifford E. Swartz—6
New fad, old fraud, Clifford E. Swartz—262
The transfer of technology, Thomas D. Miner—454
You've come a long way, Baby! Thomas D. Miner—134

EDUCATION

A Good Teaching Aid (Letter), Michael Davis—132
A personal application of physics, Dorothy Russell—234
A Preliminary Model for Effective Teaching, Robert P. Bauman—287
Abandoned Paradigms: A Source of Materials for Discussion on the Nature of Research in Physics, Menahem Finegold—401
An annotated bibliography of literature pertaining to physics lecture demonstrations, John A. Davis 523
An Attempt to Humanize Science: Miami-Dade Program, Carl A. Babski—85
The Artful Science of Observing the Teaching of Physics, Judith D. Aubrecht—145
As Others See Us — The American Physics Scene Through British Eyes, Michael Rudden—15
The British Physics Centre, Dennis Hadley and Adrian C. Wright—93
8 ways to increase student interest in physics, Dinah Moche—300
Feedback on Feedback (Letter), Jay S. Huebner—5
Hazards undermine curriculum, Ronald R. Bergsten 578
Helping the high schools (Letter), Yeu Pyng Hwu—452
How to Attract Students (Letter), Bro. Alphonse J. Matuga—388
How to measure competence (Letter), Hubert A. Kraus—452
How Valuable Are Professional Apparatus Evaluations? Herbert H. Gottlieb 518
The Ideal Introductory Physics Laboratory, John W. Gibson and John W. Layman—558
Introducing Undergraduates to a Research Laboratory or a Medium for Much Needed Message, Robert Weinberg—263
It's A Mess! (Letter), J.D. Jones—51
Lecture demonstrations are consistent with Piagetian theory, John A. Davis—299
Modified, self-paced, limited-option laboratory, J.G. Lindsay, Jr.—230
Notes of An Itinerant Demonstrator, R.C. Nicklin—72
Now Everybody Clap Your Hands, Robert W. Schramm—407
The Object of Science (Letter), J.A. Eades—5
Physics Is Great! Timothy Kersey and A.J. Fiske—25
Physics really does work, Fiona M. Gurr and Mimi Lafleur—235
Reflections on Educational Practices (Letter), V.V. Raman—68
Research Material as a Classroom Resource, Thomas V. Norton—269
Safety in the Physics Lab, Bro. T.G. Bullen— 579
Shop Skills for Physics Students, Henry Manos—151
Trying to Understand (Letter), Herbert E. Steingasse—388
Turnabout is fair play, Judith D. Aubrecht—233
You're OK and So Is Physics, Robert G. Fuller and Ward L. Sims—217

ELECTRICITY AND MAGNETISM

A resistor board, Walter C. Connolly— 572
A quickly made galvanometer shunt, James Reynolds— 572
Acoustic surface waves in piezoelectric materials — a new technology, Robert E. Apfel—109
Another Use (Letter), Glen Spielbaur—388
The Author Replies (Letter), Phillip M. Rinard—196
Current balance and Coulomb's law apparatus, Richard K. Fry and Wijit Senghaphan—435
Electrical Circuits and Water Analogies, Frederick A. Smith and Jerry D. Wilson—396
Electrostatic charging of fur and silk, John A. Davis— 571
F = q v x B; A simple demonstration, Robert M. Donner— 574
Farraday's Law and the Curtis elapsed time meter, Jay S. Huebner—114
Fast square wave generator, Ronald A. Kobiske— 572
FET electrometer, Robert H. Johns—113
Fluorescent Lights (Letter), Gerald J. White—69
Fused ammeters, S. Winston Cram
Going Three Dimensional (Letter),

Elizabeth A. Wood—196
Latex sphere clusters in Millikan's experiment, Monte Giles and Ernest Johnston— 571
Lecher standing waves, Bro. Lester Dwyer—437
Lines of Force (Letter), Mario Iona—196
Modifications to an electric field plotting apparatus, T.R. Sandin—241
Nerve Impulses in Plants, Frank J. Blatt—455
One candel current, C. Jim Bier and Jay S. Huebner—353
Photocurrent detection with an oscilloscope, Monte M. Giles— 570
Search for magnetic monopoles at NAL, Richard A. Carrigan and Frank A. Nezrick—309
Series and parallel electric circuits, Bro. James Mahoney C.F.X.— 572
Simple AC Demonstrator, Robert F. Neff— 574
Standing radio waves, Bro. Lester Dwyer—501
Three dimensional magnetic field, Walter C. Connolly— 575
Questions Some Students Ask, Walter Thumm—88, 369

ELECTRONICS

An electronics laboratory for physics students, John McKinnon—425
Families of transistor characteristics on an oscilloscope, George Barnes—239
The 4-layer Trigger diode, Jeffrey L. Hock and Ronald A. Kobiske—179
SCR, diode, and Zener diode tester, George Barnes—499
An Electronic Spirograph, J. Gerard Anderson—89
The new design x-ray image intensifier tube, Leonard Stanton—497
Photoelectric Devices in Astronomy and Space Research, George Carruthers—Part I—135, Part II—221
Tracing characteristic curves with a chart recorder, Raymond Rajotte—367

ENVIRONMENT

Environmental Topics for Introductory Physics Course, Laurent Hodges—205

HEAT AND THERMODYNAMICS

A red hot demonstration, R. Kennedy Carpenter— 570
Absorption of radiation — a lecture sized demonstration, Dean Zollman—
Bimetallic on the overhead, Mark W. Seng—360
Brownian movement, Sister Martha Ryder— 574
Gas-Law apparatus made of copper wire pipe, George Barnes—306
Heat flow and home heating economy, Albert A. Bartlett and Joseph Dreitlein—485
Home Heating Economy (Would You Believe?), Albert A. Bartlett—84
Home Heating Fuel Conservation Studies, James R. Woodyard—483
Ice cube regelation, Wallace A. Hilton—307
Inexpensive immersion heater, Frank G. Karioris— 573
Simple resistance thermometer, L.C. Corrado— 573
Regelation made easier, Robert F. Neff— 575
What is Trevelyan's Rocker? (Forgotten Lore), Ira M. Freeman—348

HISTORY AND BIOGRAPHY

The Authors Reply (Letter), Banesh Hoffman and Joan Warnow—325
Brief Chronologies Which Illustrate the Historical Development of Measurement Techniques, Apparatus, and Standard, Part 4: Measurement of Time, Paul A. Bender—155
Brief Chronologies Which Illustrate the Historical Development of Measurement Techniques, Apparatus, and Standards. Part 5: Measurement of Pressure, Paul A. Bender—479
Copernicus Quiz Extended (Letter), Paul Sherman—261
Galileo and the Inclined Plane Controversy, Paul Sherman—343
Galileo, Free Fall and Calculus (Letter), G. Daniel Goehring—324
Glimpses of Einstein— A Photo Essay, Banesh Hoffman and Joan Warnow—200
The Living History of Physics and the Human Dimension of Science, Lillian Hartmann Hoddeson—275
Making History or Reporting It? (Letter), Joseph G. Crnkovich—324
Origin of the Atwood Machine (Letter), Jon Ogborn—247
Search in Sciences — An approach for nonscience students. James Della Valle—30
Some Historical Interactions of Physics and the Biomedical Science, James Whorton—159
Wrong Address (Letter), Robert Weinstock—388

INTERNATIONAL PHYSICS EDUCATION

As Others See Us — The American Physics Scene Through British Eyes, Michael Rudden—15

MATHEMATICS

Communication, Value Systems and Algorithms for sin A, Seville Chapman—335
Graphing Henry Aaron's home run output, Herbert Ringer—43

MEASUREMENT

Drawing a tangent to a curve, Syed Ziauddin—106
Making a protractor, Robert R. Turtle—351

MECHANICS

A high speed electronic control for short-interval timers, George Barnes—438
A resonance demonstration, Monte M. Giles—178
Apparent weightlessness in free fall, Richard Breslow—366
The Author Replies (Letter), Wytze Brouwer—247
The Author Replies (Letter), D.F. Knudsen—124
Cartesian diver, Richard F. Kotheimer— 576
Center of mass, R. Kennedy Carpenter— 572
CO_2 cartridge firing mechanism, Peter Boileau—50
Coefficient of friction apparatus, Harold J. Born—367
Conservation of angular momentum in a rotating fluid, Keith Aldridge—493
Energy and the Escalator, Janna Coenraads—238
Falling Body Apparatus M105, An Evaluation, Noah Rosenhouse—176
The firefly, an LED Blinky, David W. Eckert and James Schimpf—48
Free-fall, induction and oscilloscope, B.G. Eaton—115
Friction on the air track, Robert P. Barrett—297
Inertia demonstration, Paul G. Hewitt—30

Introducing potential energy, Bro. James Mahoney C.F.X.—100
Kinematics and the driver, Barton Palatnick—229
Length of Ballistic Pendulum (Letter), Mario Iona—189
Liquid surface in rotation, Walter C. Connolly—502
Mass and Weight Again (Letter), Claudio Gonzalez—5
Mechanical resonance with an incandescent filament, John Kwasnoski—302
Measuring the thrust of a model rocket, Mervin Brubaker—488
The meter stick pendulum, L.C. Corrado—494
More on the Cartesian Diver (Letter), Frank T. Dietz—51
On the derivation of the radial and tangential acceleration formulas, R.N. Mathur—41
Origin of the Atwood Machine (Letter), Jon Ogborn—247
P.S. to Potential Energy (Letter), Bro. James Mahoney C.F.X.—308
Parking lot physics with real cars, Robert J. Kenney—491
The physics of Bing-Bang-Boing, Dean Zollman—358
Plywood gate for equilibrium problems, James H. Stith—502
Process or Process Approach (Letter), Mario Iona—197
Projectile gun for an air track glider, George Barnes—177
Projectile launchers for electric trains, Robert Q. Kimball— 571
Projectile motion and circular orbits, Van E. Neie—102
Revealed Truth Challenged! (Letter), Joseph G. Crnkovich—4
The rocket game, Gregory Baker and Cameron C. Pitcairn—427
Rubber band lab, John Dowling, Jr. and George H. Mullen—231
Rubber Band Lab (Letter), Robert Kern Curtis—452
Simple accelerometers, Robert Gardner— 572
Sound-proofed box for air track blower, John A. Davis— 573
The speed of a pendulum bob, Richard F. Kotheimer— 570
Suspension Bridges, Thomas B. Greenslade, Jr.—7
Ultrahigh vacuum with a high-class electric fan, David Lichtman—433
Up or "Up"? (Letter), Mario Iona—69
Using a laser to investigate free fall, Edward V. Lee—168
Vectors with a chalk line, Edwin Paul Heideman 574
When a is not g (Letter), Robert P. Bauman—324
Wrong Address (Letter), Robert Weinstock—388

MULTI-MEDIA AIDS

A perfect circle without a compass, Edwin Paul Heideman 570
A projection Foucault pendulum (Projection Pointers), Francis Lestingi—311
Hallway showcase question board, J.G. Lindsay, Jr., R.D. Nicklin and J. Watson—172
Illustrating and pacing with laboratory slides, Robert C. Hughson—429
Inexpensive 35mm slides made using a xerox machine, Lutz Kurzweg—174
Laboratory notes on slides, Thomas B. Greenslade, Jr.—431
Mirror projection of an electroscope, Edwin Paul Heideman—368
Overhead projection — On the chalk board, Jack L. Flinner—108
The Physics Activities Center — A Mini-Exploratorium, Dean Zollman—213
Reuseable chalk board graphs, Edwin Paul Heideman— 570
Use of video in the Harvard Project physics experiments, Joyce Quan—106
Using a stereo tape recorder as a demonstration device, Robert W. Schramm—172
Vectors with a chalk line, Edwin Paul Heideman— 574
Video taping experiments, Robert H. Johns—107

NUCLEAR PHYSICS

Commercial Nuclear Steam-Electric Power Plants, Ferdinand J. Shore—Part I—327, Part II—411
Limits to the production of nuclear energy, Marvin L. DeJong—296
The Quark — A decade later, James T. Dakin—45
Rutherford scattering box with 10^7 GeV accelerator, Jerry D. Wilson—437
Storage and display box for a diffusion cloud chamber, Haym Kruglak— 568
What's a Spinthariscope? (Department of Forgotten Lore), Michael Davis—406

OPTICS

A Pinch of Coffee-mate (Letter), Ben M. Doughty—132
The Author Replies (Letter), R. Kennedy Carpenter—325
Bichromatic light source for

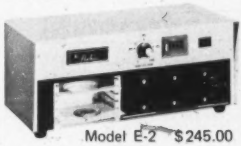
radioactivity!

It starts with...

the Nucleus

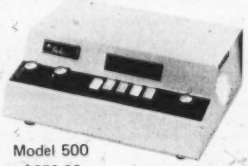
The "hot" source for nuclear science instrumentation, radioisotopes, and accessories.

Student Scaler — built-in detector



Model E-2 $245.00

All purpose scaler/timer



Model 500
$350.00

Complete scintillation spectrometer systems

Model AA-2010 $995.00

License exempt
educational radioisotopes
Lab Manual Accessory items

the Nucleus®

KLINGER PHYSICS EDUCATION APPARATUS
...WE COULDN'T BE MORE COMPETITIVE!

Here's a wealth of new ideas for demonstration and laboratory experiments to meet the needs of modern, self-pacing education. This new group helps the student to:
- gain confidence in assembling experimental components into working models;
- have full assurance of equipment durability;
- explore each exercise through provocative suggestions and questions;
- gain full understanding of what he is doing.

Every item is sturdy, fool-proof and complete with instruction manuals that are models in the industry. Klinger-originated experiments and apparatus are described in leading physics experiment handbooks.
Among many items in the new Klinger catalog are: Blackboard Optics; Molecular, Orbital and Crystal Structure Models; the Braun Electroscope; Basic Optics Kit; dissected Cathode Ray oscilloscope; Franck-Hertz Electron Impact Apparatus; Revolving Mirror Apparatus; and more! Write for your catalog today!

MEETINGS CALENDAR

DECEMBER

6, Friday
SPS Regional Meeting (Zones 4, 5, and 6). Atlanta, Georgia. (D.W.J. Shea, Director, Society of Physics Students, PO Box 775, Stony Brook, NY 11790)

B.S. GRADUATES IN PHYSICS

The Department of Physics at Indiana State University has a number of assistantships and fellowships available for students interested in obtaining a Master's degree in physics or appropriate related disciplines. The Department has active research underway in the areas of physics instruction, energy systems, environmental physics, biophysics, solid state, nuclear and particle physics, and theoretical physics.

Further information and applications may be obtained by writing
Dr. R. A. Llewellyn, Department of Physics, Indiana State University, Terre Haute, Indiana 47809.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION

(Act of October 23, 1962; Section 4369, Title 39, United States Code)

1. Title of Publication: THE PHYSICS TEACHER
2. Date of Filing: October 1, 1974
3. Frequency of Issue: 9 times yearly
4. Location of Known office of publication:
   335 East 45th Street, New York, N.Y. 10017
5. Location of the headquarters or general business office of the publisher:
   335 East 45th Street, New York, N.Y. 10017
6. Names and address of publisher, editor, and managing editor:
   - Publisher: American Institute of Physics, Inc., 335 East 45th Street, New York, N.Y. 10017
   - Editor: Clifford E. Swartz, State University of New York Stony Brook, N.Y. 11794
   - Managing editor: Arthlyn Ferguson, State University of New York Stony Brook, N.Y. 11794
7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding one percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given).
   American Association of Physics Teachers
   Drawer A-W, Stony Brook, N.Y. 11790
8. Known bondholders, mortgagees, and other security holders owning or holding one percent or more of total amount of bonds, mortgages or other securities: None.
11. Extent and nature of circulation:

A. Total no. copies printed (net press run)	12,293 *	11,613 **
B. Paid circulation		
1. Sales through dealers and carriers, street vendors and counter sales	none	none
2. Mail subscriptions	9,756 *	9,439 **
C. Total paid circulation	9,756 *	9,439 **
D. Free distribution (including samples) by mail, carrier or other means		
1. Samples, complimentary and other free copies	159	170
2. Copies distributed to News Agents, but not sold	none	none
E. Total distribution (Sum of C and D)	9,915 *	9,609 **
F. Office use, left-over, unaccounted, spoiled after printing	2,378 *	2,004 **
G. Total (sum of E & F—should equal net press run shown in A)	12,293 *	11,613 **

I certify that the statements made by me above are correct and complete.

G.F. Gilbert, Treasurer

* Average no. copies each issue during preceeding 12 months.
** Actual number of copies of single issue published nearest to filing date.

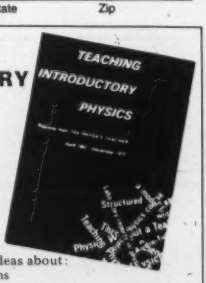
TEACHING INTRODUCTORY PHYSICS

Reprints from
The Physics Teacher



AAPT member $4.90
Nonmember $7.00

More than 100 pages of ideas about:
- Innovative course designs
- Meeting the needs of special students
- Use of media
- Problems of teaching introductory physics in high schools and colleges

Excellent for preservice teaching candidates and graduate teaching assistants

Yes, please send me . . . . . copy(ies) of TEACHING INTRODUCTORY PHYSICS
$4.90 (AAPT members only) or $7.00 (nonmembers)

Return to the American Association of Physics Teachers, Publications Dept., Drawer AW, Stony Brook, N.Y. 11790

☐ Check enclosed (no cash, please); prepayment required for all orders.

☐ I am an active AAPT member. ☐ I'd like to join AAPT; please send me an application.

The Ealing Air Table
(The world's flattest.)

The central square meter of surface is flat to ±0.1 mm. And the rugged, patented construction features an aluminum honeycomb, epoxy bonded to thick black phenolic top and bottom panels.

The large models are perfect for lecture hall demonstrations. The smaller versions are ideal for student use.

All details, along with over 1800 other Science Teaching products are available in our 197-4 catalog.

Send for your free copy.
